SKU-1234 - Wireless Headphones

AI Assessment Likely Targeted by Abuse

This SKU has a significantly higher return rate than category average, with high customer concentration and common fraud patterns (e.g., INR claims, short return latency). Not a typical product quality issue.

Supporting Signals

- Return rate 68% (vs 18% expected)
- High concentration (Top 5% customers = 72%)
- Linked to 6 suspicious accounts
- Frequent INR claims (22%)

Contradictory Signals

- No significant defect reports
- Product ratings are normal (4.2/5)
- Return rate not increasing over time
